KODDE RADIO INTERNATIONAL

Koode Media Academy and Consultancy is a Nigeria registered organization with a focus to connect the Fulbe (also known as Fulanis, Peul or Fula) communities on its Koode Radio International (KRI) shortwave programmes designed to engage Fulfulde speakers by synchronizing the traditional and the modern methods to foster building blocks for early warnings and response mechanism for food security and livestock, promotion of cultural literacy, strengthening of cultural awareness and protection of the Fulbe cultural heritage as well as promoting access, through mapping and identification of basic health services around cattle ranches and along the grazing routes.

The KRI is an international radio station with Fulfulde as the major broadcasting language, evidently it's one of the most endangered language. There are over 70 million speakers of the language dispersed across the African continent, Fulfulde is not a language spoken in a particular geographical area within Africa which makes it one of the African languages that spreads across the continent.

In Africa, radio broadcast is especially the most popular platform among Fulbes as information is power. Their attachment to the radio is one of the things that distinguishes them from other ethnic nationalities. It is for this reason that Koode Media Academy reached an agreement with Media Broadcast of Cologne, Germany which is one the best broadcast frequency provider in the world, to inaugurate a shortwave radio that is being received in the whole of Sahel zone and beyond, covering the Sahel and entire Central and West Africa. We do broadcast shortwave and also, we are 24/7 online via Tunein, Facebook, WhatsApp, Instagram and YouTube.

Taskaramji/Programs

Our daily broadcast programs includes feature magazines on: Culture, Dialog, History, pastoralism and farming, health care, women, youths, telephone conversations with listeners, environment, politics, guest of the week, education and Fulbe musician of the week. In addition in Koode Media Academy we are also training journalists on different journalistic profession, because as at now there are few fluent Fulfulde speaking journalists.
